Projects

Nutrient Variability Analysis for Food Labeling | *Python, Pandas, Matplotlib, Seaborn* **Apr 25 – May 25**

- Analyzed USDA FoodData Central dataset (8,000+ items) to study macronutrient and calorie conversion variability across categories.
- Identified outliers (e.g., Category 20 high calories/carbs) and method-dependent differences (Vitamin C sensitivity).
- Derived actionable insights regarding nutritional labeling reliability, highlighting inconsistencies in reported values and discussing their broader implications on dietary assessment, health planning, and consumer decision-making.
- Repository Link: **https://github.com/Dimple04152/Nutrient-Analysis-FoodData-Central**

Maldives Tourism Performance Dashboard | *Power BI, Python (ETL)* **Nov 25 - Dec 25**

- Extracted and cleaned multi-year tourism data from PDF reports; built fact tables for arrivals, occupancy, and airlines.
- Created interactive Power BI dashboard with slicers and visuals revealing 65.25% avg occupancy, 4M arrivals, and Emirates dominance (1.4M passengers).
- Enabled exploratory analysis of operational trends and facility distribution supporting data-driven decision-making.
- Repository Link: **https://github.com/Dimple04152/tourism-etl-project**

Educational Insights Dashboard | *Excel, PivotTables, Slicers* **Apr 25 – May 25**

- Analyzed real-world Pune school enrollment dataset (6,075 schools); cleaned and modeled data for multi-dimensional insights
- Built interactive dashboard showing zonal distribution, management diversity, and operational stability (~90%)
- Uncovered key insights: Yerawada zone leads with 632 schools, ~90% operational stability, and MNC management dominates enrollment — supporting educational planning and equity analysis

INTERNSHIP

INFOSYS Springboard | Python, FastAPI, PostgreSQL, Redis, SQL Alchemy, REST APIs **Jan 26 – Ongoing**

- Designed an **AI-powered stock screener** supporting natural language financial queries via **LLM → DSL → SQL** pipeline
- Implemented a **custom SQL compiler and execution layer** generating safe parameterized SQL from structured DSL queries
- Built **REST APIs for companies, portfolios, alerts, and AI queries** with JWT authentication and protected endpoints.
- Developed **data ingestion pipeline** integrating Alpha Vantage and Yahoo Finance APIs with parsing, normalization, and Redis caching

Certificates / Certifications

Agile with Atlassian Jira | *Coursera — Certificate Link* **Jan 26**

AI Fusion Competition- 1st position | *IIT Ropar — Certificate Link* **Feb 25**

Skills

Languages: Python, C++, Java
Technologies/Frameworks: FastAPI, Redis, SQLAlchemy, REST APIs, Pandas, NumPy, Matplotlib, Seaborn, Power BI, Excel (PivotTables/Slicers), Flask, Git, GitHub, Agile Methodologies
Domain Skills: Machine Learning, Computer Vision, Exploratory Data Analysis, Statistics, Data Structures & Algorithms, Data Visualization
Databases: MySQL, MongoDB, PostgreSQL
Soft Skills: Analytical Problem-Solving, Collaborative Teamwork, Proactive Project Management, Agile Adaptability

Education

Lovely Professional University **2023 – 2027**
Bachelor of Technology - Computer Science and Engineering — CGPA: 7.93 *Phagwara, Punjab*

Kendriya Vidyalaya No. 1, Jalandhar Cantt **Apr 20 – Mar 22**
12th — Percentage: 88.0% *Punjab*

Kendriya Vidyalaya No. 1, Jalandhar Cantt **Apr 19 – Mar 20**
10th — Percentage: 93.0% *Punjab*
